TYPE TREATMENTS

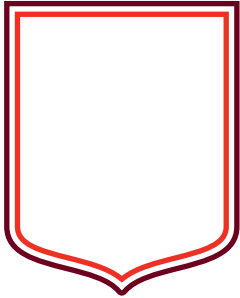

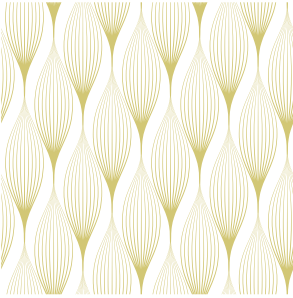

When crafting titles we use a combination of type families with the main title being 20% larger. 100pt of kerning and all caps are also employed across both heading and sub heading. Type families may be alternated to have enough differentiation when multiple headings are present in a composition. Below are examples of 2 line and 3 line headings. Leading between lines for a 3-line treatment should be visually equal.

The above text is how we style body copy. It’s set in Verlag with 30pt kerning.
